

# Introduction to the week

Fabrice.Kordon@lip6.fr

# What you already know

## Implement a «single view» application

- Even some complex ones
- Handling views
  - ▶ With/without Storyboard
  - ▶ Programmatically
  - ▶ Use of VFL
  - ▶ Handling devices & orientations
- Use delegation
- Use various forms of handlers

## You reached a milestone

- You should be autonomous
- This is all for «simple views»
- Still some to discover (e.g. UIDynamics)
  - ▶ You can do it yourself with the help of the

# What's next this week

 **We reach the second part of this course**

- Provide you with stuff to give an «extra» to your Apps

 **What stuff?**

- Geolocation
  - Map manipulation
  - Localization (language)
  - Cameras
  - Contacts
- ) big stuff

 **These are complex frameworks**

- Intensive use of delegation
- Presentation of typical examples
