

# Introduction to the week

Fabrice.Kordon@lip6.fr

# What you already know

## Many things indeed!

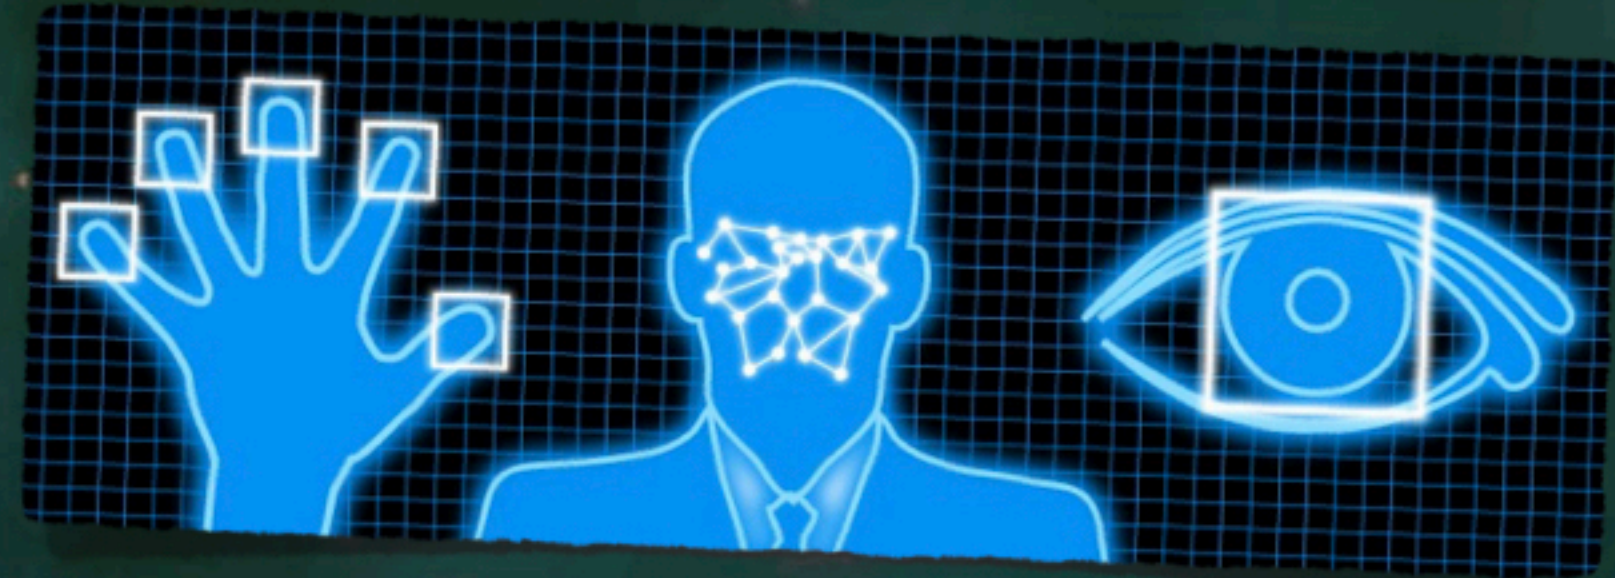

- 👤 Implement applications (even complex ones)
  - ▶ Geolocation, multilingualism, cameras/photo library contact book, sounds & video, touch/multi-touch use of device's sensor
- 👤 Handling view
  - ▶ MVC, storyboard, programmatic, constraints with VFL, orientation, etc
  - ▶ Hierarchies of views, sophisticated view arrangement
- 👤 Delegation
  - ▶ A large practice!
- 👤 Networking
  - ▶ Access to web services / XML parsing, a bit of JSON
  - ▶ Bonjour-based applications
- 👤 data persistency
  - ▶ Preferences & settings
  - ▶ Storage & setialisation

# What's next this week

## In-App authentication

- Play with code & biometrics

## Using Objective-C in a Swift project

- And a bit of the reverse

## iOS extensions & Watch app

- Today extensions
- Basic Watch apps development
- Two-ways communication Watch/Phone

## A bit about CarPlay

- Relationships with external hardware
